## **1. Introduction**

### **1.1. Disclaimer**

box80 is experimental open source software and is not guaranteed to work correctly in all conditions.

All trademarks are acknowledged as belonging to their respective owners.

### **1.2. Document purpose**

This document is the User Manual for box80. Its purpose is to provide a reference on how the application should be used, with examples where appropriate.

### **1.3. Application scope**

box80 is a multi-platform Z80 Virtual Machine available for Windows, Linux and MacOS.

Being open source, the software naturally lends itself to being extensible should other processor types or families be required or other target operating systems be required.

### **1.4. Application features**

Here are some of the key features of XA80:

- To be written
